1K Carbon Fiber in Hybrid Shaft

Singular Color for Full Family

TENSEI™ 1K PRO HYBRID

TENSEI™ 1K Pro Hybrid is a product born from the success of TENSEI™ 1K Pro Wood shafts. Golfers gravitated towards the stability and feel they found in 1K Pro Wood shafts, so we began to develop a product to allow golfers to carry this feel from their woods into their hybrids.

Instead of creating hybrid structures for each individual color of the TENSEI™ 1K Pro Wood line, our engineers took the best bits of all colors to unify under a singular, mid-launch, mid-spin TENSEI™ 1K Pro Hybrid structure and used a silver band.

TENSEI™ 1K Pro Hybrid takes learnings from all our previous TENSEI™ hybrid shafts, but perhaps none more than our very popular CK Pro Orange Hybrid shaft. TENSEI™ 1K Pro Hybrid features a counterbalanced structure to create more ball speed and higher launch, but also incorporates super-premium 1K carbon fiber into the handle section, creating a smoother feel and more stability. This also leads to less imperfection in the shaft for more consistent performance.

TENSEI™ 1K PRO HYBRID FEATURES
