# MMT" PARALLELIRONS Redefining Performance for Iron Shafts 

Available Now at Authorized Dealers Worldwide

Maximizes Benefits of Composite and Steel Performance

Proprietary, Patent Pending Metal Mesh Technology
Available in Both Parallel \& Taper Versions
$\therefore$ MITSUBISHICHEMICAL
$\therefore$ MITSUBISHICHEMICAL

Designed to maximize the benefits of both composite and steel performance，our patent pending Metal Mesh Technology represents the very best of the Mitsubishi end－to－end manufacturing approach．As layers of prepreg are stacked to build the shaft＇s core，a small section of unique Metal Mesh is integrated towards the tip．This Metal Mesh－made up of individually braided strands of 304 Stainless Steel－improves the density and stability of the shaft，while also allowing for thinner overall composite wall construction．Together this yields a finely tuned，highly responsive shaft that still provides the consistent launch and spin control needed for effective iron play．

## THE MMT™ ORIGIN STORY

＂It was an idea from our archery division along with 30 years of expertise in compos－ ite golf shafts that became the basis for MMT，an entirely new way to think about the possibilities for iron shaft performance．．．＂

## MMT™ PARALLEL IRON SPECS

| Description | Flex | Length（in） | Weight（g） | Tip OD（in） | Tip Length（in） | Butt OD（in） | Torque（ ${ }^{\circ}$ ） | Kick Pt． |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| MMT $^{\text {™ }}$ Iron 40 | L | 42 | 48 | 0.370 | 5.5 | 0.578 | 6.2 | MID |
| MMT $^{\text {™ }}$ Iron 50 | L | 42 | 57 | 0.370 | 5.5 | 0.593 | 5.9 | MID |
| MMT $^{\text {™ }}$ Iron 60 | A | 42 | 62 | 0.370 | 5.5 | 0.586 | 5.9 | MID |
| MMT $^{\text {mw }}$ Iron 60 | R | 42 | 64 | 0.370 | 5.5 | 0.588 | 5.6 | MID |
| MMT $^{\text {m }}$ Iron 70 | R | 42 | 73 | 0.370 | 5.5 | 0.592 | 5.1 | MID |
| MMT ${ }^{\text {ma }}$ Iron 80 | R | 42 | 84 | 0.370 | 5.5 | 0.590 | 3.9 | MID |
| MMT $^{\text {mM }}$ Iron 80 | S | 42 | 86 | 0.370 | 5.5 | 0.592 | 3.7 | MID |
| MMT $^{\text {mM }}$ Iron 90 | S | 42 | 98 | 0.370 | 5.5 | 0.600 | 3.4 | MID |

## MMT™ PARALLEL FITTING GUIDE

| Speed MPH／YDS | 80／210 | 81－90／210－239 | 91－105／240－259 |
| :---: | :---: | :---: | :---: |
| MMT ${ }^{\text {mM }}$ Iron 40 | L |  |  |
| MMT ${ }^{\text {m }}$ Iron 50 | L |  |  |
| MMT ${ }^{\text {m }}$ Iron 60 | A | R |  |
| MMT ${ }^{\text {m }}$ Iron 70 |  | R |  |
| MMT ${ }^{\text {m }}$ Iron 80 |  | R | S |
| MMT ${ }^{\text {ma }}$ Iron 90 |  |  | S |
