

# *Kai'li* BLUE

MID-LAUNCH. LOW TORQUE. DEEP POWER.

---

**NEW** Kai'li™ Blue Profile Available Summer 2022

Low Torque Comparable to Low-Launch Shaft

Super Low Resin Content Prepreg in Torque Core

# KAI'LI™ BLUE

Kai'li™ Blue proves that intimidating power comes in more than one form. With a low torque value similar to Kai'li™ White, the taper butt design of Kai'li™ Blue offers an active feel in the hands and higher launch and spin than Kai'li™ White – giving players two extraordinary-feeling Kai'li™ profiles that produce different launch and spin conditions. Kai'li™ shafts utilize Mitsubishi Chemical's Super Low Resin Content (S.L.R.C.) Prepreg and an MR70-reinforced tip, which combine to make Kai'li™ Blue our stabelest and smoothest blue profile yet. A modern mid-launching, mid-spinning shaft built to provide the stability demanded by stronger swings and heavier head weights.

**Player Profile:** Ideal for players moving from a low-launch to mid-launch shaft without sacrificing lower torque.

## KAI'LI™ BLUE FEATURES

✓ TORQUE COMPARABLE TO LOW-LAUNCH SHAFT ✓ MR70 CARBON FIBER ✓ SUPER LOW RESIN CONTENT PREPREG
