

NEW **TENSEI™** AV

Trusted Label + Leading-Edge Technology

NEW Aluminum Vapor + Xlink Tech™ Resin System

Available in Low/White + Mid/Blue Launch Profiles

Available from 55R to 85X across Series Range

NEW TENSEI™ AV Series

The NEW TENSEI™ AV Series is the next evolution of the successful TENSEI™ AV Series. The revolutionary proprietary Xlink Tech™ Resin system has been incorporated into the existing TENSEI™ AV structure to promote higher modulus and higher elongation. The result is a significantly more carbon-rich structure that maximizes strength and improves feel, without sacrificing performance or durability. Additionally, the incorporation of Xlink Tech™ Resin into TENSEI™ AV Series shafts promotes greater stability and tighter dispersion without compromising ball speed. The NEW TENSEI™ AV Series is available in both a classic, mid-launch, mid-spin Mitsubishi blue profile (NEW TENSEI™ AV Blue) and a stiff-tip, low launch, low-spin profile (NEW TENSEI™ AV White).

Player Profile: NEW TENSEI™ AV Blue is best for the player seeking a mid-launch profile with tighter dispersion. NEW TENSEI™ AV White is for the player looking for a lower trajectory and penetrating ball flight.
