The Newest Profile: Mid Launch, Low Spin

Made to Maximize the Modern Fitting Experience

Diamana™ GT SERIES

The 5th Generation Diamana™ family has expanded with the all-new Diamana™ GT. Designed based off the multiple-major winning 4th Generation Diamana™ ZF profile, the mid launching, low spinning Diamana™ GT incorporates several new technological advancements into an existing successful structure. Diamana™ GT was constructed with our breakthrough, proprietary Xlink Tech™ Resin System, a new technique that allows us to reduce the resin content of the shaft for the best feel possible while not diminishing the overall strength of the product. Featuring a firmer butt section than its siblings Diamana™ TB and Diamana™ PD, GT creates more flexibility in the shaft's midsection while maintaining a firm tip.
