**NEW** Available Early 2022 at Authorized Dealers

TiNi Technology in Woods for Enhanced Stability

Bold + Modern + All-New C6™ Family Cosmetic

# C6™ 2022 FAMILY

The next evolution of Mitsubishi Chemical's aftermarket exclusive C6™ family uses our iconic Titanium Nickel (TiNi) Wire technology in an all-new application. Titanium Nickel is what's known as a memory metal – a material that resists deformation and always works to return to its resting state.

The new **C6™ RED** features a bright, bold new cosmetic and Mitsubishi Chemical's renowned TiNi Wire Technology in an all-new application in the tip section. By moving the shaft's kick point lower, Mitsubishi Chemical engineers were able to achieve a higher trajectory and mid-high spin characteristics, in a stable and forgiving package.

The new **C6™ BLUE** features a beautiful updated, modernized cosmetic and utilizes Mitsubishi Chemical's TiNi Wire Technology in an all-new application in the tip section. The result is a smooth, responsive, mid launch/mid spin shaft to help deliver the club head more consistently.

**C6™ BLACK** offers the perfect complementary offering in separate iron and hybrid shaft series.

## C6™ RED + BLUE SPECIFICATIONS

PRODUCT	FLEX	LENGTH (IN)	WEIGHT (g)	TIP O.D. (IN)	TIP LENGTH (IN)	BUTT O.D. (IN)	TORQUE (°)	KICK PT.
