DIAMANA™ BB

Diamana BB (Blue Board) – the second profile in the most recent generation – is designed with all the traditional branding that made Diamana so beloved – including a return to the original 53/63/73/83 weight class designations – and all the engineering prowess and material innovation that made the brand dominant on tour.

To deliver maximum increased energy transfer, Super high-modulus 80-Ton Dialead Pitch Fiber is used in the butt section. To lower torque and provide greater stability, high modulus 46 ton fiber is used in the shaft's angle plies. And, to retain Diamana's 'unlike any other' feel, Mitsubishi has incorporated their proprietary Xlink Tech system to increase overall strength and durability of the shaft while also driving carbon fiber volume up for better feel.

KEY SHAFT FEATURES

- ✓ DIAMANA'S CLASSIC, SMOOTH MID-LAUNCH PROFILE
- ✓ MR70 FIBER + XLINK TECH™ RESIN SYSTEM
