DIAMANA™ OG LTD 2024

Mitsubishi Golf is excited to announce a **very limited run** of the **original shaft graphic** and **profiles** that set the standard in driver shaft performance. Our team has recreated the iconic **Blue (S-Series)** and **White (D-Series)** board profiles to celebrate the legacy and tradition that the Diamana™ brand has created over the last 20 years.

Celebrating 20 Years of Diamana™. We didn't know it at the time, but in 2004, **the golf equipment world changed forever** with the introduction of a new shaft brand called 'Diamana™'. Developed in Japan, the first Diamana™ shafts featured the now iconic flowers and surfboard, a respectful homage to the Hawaiian islands and the basis, today, of every 'board' profile descriptor in the golf shaft industry. And while those wholly unique and unmistakable cosmetics may have turned a few heads, it was the unparalleled performance of these blue, and white board shafts that fueled adoption on tour and began the unmatched win count. The very first blue (mid launch), and white (low launch), Diamana™ shafts used distinct EI curves and distinct kick point locations. That allowed golfers to achieve different launch and spin conditions without deviating much from what would become known as the classic Diamana™ feel.

Limited Quantities Available – Contact your Sales Representative for Details.
