Wide Range of Weights/Flexes from 40R2 to 80TX

Made to Maximize the Modern Fitting Experience

# Diamana™ TB SERIES

Diamana™ TB-Series shafts are designed to maximize the dedicated fitting experience. Through new Consistent Feel Design, Diamana™ TB-Series feature minimal variance in butt OD, weight and balance point throughout the entire range – from 40R2 to 80TX. This minimizes any change in feel as a player shifts between options, allowing a fitter to focus on finding the perfect weight and flex pairing for maximum performance. Combined with Mitsubishi Chemical's latest innovation in resin technology — which helps produce a carbon-rich structure that is both stronger and more responsive — the TB Series is the ideal amalgam of superior fit and superior performance in a smoother, more stable blue-board profile.
