

# *Kai'li* **WHITE HYBRID**

LOW LAUNCH KAI'LI HYBRID PERFORMER

---

**NEW** Kai'li™ White Hybrid Available Early 2023

Designed to Complement Kai'li White Wood

Featuring Aerospace-Grade MR70 Carbon Fiber

# KAI'LI™ WHITE HYBRID

Kai'li White Hybrid shafts were built to bring strength and stability that hybrids sometimes lack. Reinforced with aerospace grade MR70 material, Kai'li White Hybrid shafts provide additional tip strength and penetrating, low-launch, low-spin launch conditions to a club that can at times be difficult to control. Kai'li White Hybrid shafts are built in a wide range of flexes from 80 R through 100 TX to bring consistent Kai'li White performance to as many players as possible.

**Player Profile:** Kai'li White Hybrid shafts are ideal for golfer looking for added stability and tighter dispersion in their hybrids.

## KAI'LI™ WHITE HYBRID FEATURES

✓ LOW LAUNCH, LOW SPIN    ✓ MR70 CARBON    ✓ LOW TORQUE, EXTRA STABLE
