OT™ IRONS

360° Unidirectionally-Balanced Design

NEW Available at Select Dealers in Early 2022

Proprietary, Symmetrical Construction + Raw Cosmetic

Premier Iron Shaft Brand to Complement Diamana

OT™ IRONS

Now presented in a raw cosmetic, OT is designed for golfers seeking repetitive performance from their irons in a beautiful finished product. OT irons feature a 360° - unidirectionally balanced design that focuses on eliminating any gaps and inconsistencies that can arise with traditional sheet prepreg construction. This proprietary, symmetrical construction technique enables the golfer to more regularly hit launch windows as the shaft loads and deflects more consistently through impact.

Player Profile: OT iron shafts are ideal for golfers seeking optimal launch and trajectory out of a premium, technologically-advanced composite iron shaft.

OT™ IRONS FEATURES

- ✓ UNIDIRECTIONALLY BALANCED DESIGN
- ✓ 75 TO 105 GRAM OPTIONS
- ✓ DISTINCT RAW COSMETIC
