

A MATERIAL DIFFERENCE

# TENSEI™ 1K RED

SMOOTH MID-TO-HIGH LAUNCH PROFILE

---

**NEW** TENSEI™ 1K RED Profile

Exclusive 1K Carbon Fiber + 20FAW

State-of-the-Art Rip Tip Technology

# TENSEI™ 1K RED

TENSEI™ 1K Red provides our lightest weight, highest-launch member of the 1K family. This 2026 version has the 1K Carbon Cloth repositioned from the butt-section further towards the tip-section to help reduce shaft twisting. In addition, the series features our all-new RIP Technology designed to further reduce torque without adding weight.

Add the subtle, yet premium matte clear finish and you get a shaft that gives players the high launch, controlled spin and premium feel they need and the good looks they desire.

**NEW RIP Technology Overview:** Reverse Interlaminar Placement (RIP) enhances stability and minimizes torque, utilizing proprietary carbon fiber that is five times thinner and lighter than conventional material. This ultra-thin 20FAW material technology—strategically positioned in the traditionally high-twist tip section of the shaft—blends seamlessly with the other layers of the shaft, providing exceptional feel and feedback while ensuring precision and control in every swing.

**Who should play it?** Anyone looking for a smooth, ease of launch mid-to-high shaft should start with TENSEI 1K Red.

## TENSEI™ 1K RED FEATURES

- ✓ EXCLUSIVE 1K CARBON FIBER
- ✓ 20FAW MATERIAL
- ✓ RIP TIP TECHNOLOGY
