

Kai'li™ Red

HIGH LAUNCH, MID SPIN

WOOD SHAFTS

The Kai'li™ Family has been completed with the release of the high-launch, mid-spin Kai'li™ Red — proof positive that low torque stability is not restricted to low-launch, low-spin performance. Indeed, the Kai'li™ Red series accomplishes super low torque performance, comparable to its siblings White and Blue, despite producing higher launch and spin conditions. Built with aerospace-grade MR70 material for maximum strength and Super Low Resin Content prepreg for feel, Kai'li™ Red creates different launch characteristics than Blue and White through the use of a softer tip flex and higher balance point. Kai'li™ Red is built for the golfer seeking speed and deep power off the tee who also prefers a higher launch angle.
