

Diamana

DIAMANA™ RB HYBRID

RESPONSIVE FEEL WITH CONTROLLED STABILITY

Retro Cosmetic with State-of-the-Art Materials

Responsive Performance with Consistent Feel and Control

DIAMANA™ RB HYBRID

DIAMANA™ RB Hybrid Overview

Diamana™ RB Hybrid shafts are engineered for golfers seeking a more responsive feel without sacrificing stability or control. Leveraging technology from the renowned Diamana driver shaft family, the RB Hybrid incorporates high-modulus carbon fibers and a distinct taper design to deliver consistent feedback and confidence throughout the swing.

A responsive tip section enhances player feel, while the reinforced butt section maintains stability through impact for greater consistency. Advanced materials improve overall responsiveness and control, inspiring confidence from a variety of lies. Designed to complement Diamana™ RB driver and fairway shafts, the RB Hybrid enables golfers to create a unified wood and hybrid setup built around consistent feel and dependable performance.

Best For: Players seeking a responsive feel with controlled stability and consistent performance.

DIAMANA™ RB HYBRID FEATURES

- ✓ VERSATILE SMOOTH FEEL
- ✓ DEPENDABLE PERFORMANCE
- ✓ HIGH MODULUS CARBON FIBERS
